

CREATING WEBSITE USING VISUAL STUDIO CODE, GIT, GITHUB, AND GITHUB PAGES

This manual explains how to create, connect, and deploy your portfolio website using Visual Studio Code, Git, GitHub, and GitHub Pages.

Step 1 — Install Visual Studio Code

Download and install Visual Studio Code from <https://code.visualstudio.com>

Step 2 — Install Git

Download Git from <https://git-scm.com/downloads> and install with default settings.

Step 3 — Verify Git Installation

Open VS Code → Terminal → New Terminal and type:
git -version

Step 4 — Create Website Folder

Create a folder named Website_Gayu.

Inside it create:

- index.html
- style.css
- images folder

Step 5 — Open Folder in VS Code

Open VS Code → File → Open Folder → Select Website_Gayu

Step 6 — Initialize Git

In VS Code terminal type:
git init

Step 7 — Configure Git Username and Email

Run these commands:

```
git config --global user.name "Gayathiri V"  
git config --global user.email "your_email@gmail.com"
```

Step 8 — Add Files to Git

Run:

```
git add .
```

Step 9 — Commit Files

Run:

```
git commit -m "Initial Portfolio Website"
```

Step 10 — Create GitHub Repository

Go to <https://github.com>

Create a new repository named Website_Gayu.

Do not initialize with README.

Step 11 — Connect Local Project to GitHub

Copy repository URL and run:

```
git remote add origin https://github.com/yourusername/Website_Gayu.git
```

Step 12 — Push Code to GitHub

Run:

```
git branch -M main
```

```
git push -u origin main
```

Step 13 — Enable GitHub Pages

Open GitHub repository → Settings → Pages

Select:

- Source: Deploy from branch

- Branch: main

- Folder: /root

Click Save.

Step 14 — Access Live Website

Your portfolio website will be available at:

https://yourusername.github.io/Website_Gayu/

Step 15 — Update Website Later

Whenever you make changes, use:

```
git add .
```

```
git commit -m "updated portfolio"
```

```
git push
```

Congratulations! Your portfolio website is now connected to GitHub and deployed online using GitHub Pages.
